Arrangements for the taking of the Census	1
Area of Calcutta within the limits of the Ordinary Civil Jurisdiction of Her Majesty's High Court	12
Area occupied by public and private Tanks, public Squares, and by public Thoroughfares	12
Area occupied by public and private Tanks and Squares within the Town	13
Area occupied by public Roads and Lanes within the Town	13
Area occupied by places of Worship within the Town	13
Area occupied by Burial-grounds within the Town	13
Area occupied by Buildings and Compounds within the Town	13
Number of Houses and Huts	13
Population of the Town	13
Average Area occupied by Buildings	13
Mean space allotted to each person	13
Area of the Northern and Southern Divisions respectively	14
Number of Houses and Huts, and of their Inhabitants	14
Population of both Divisions, according to Sexes	14
Proportion of Males to Females	15
Proportion of Children to Adults	15
Male Population, according to Ages	15
Relative proportion of average Area occupied by Buildings, and of mean space allowed to each person in the Southern and Northern Divisions of the Town	16
Area occupied by, and average width of, Streets in the Southern and Northern Divisions of the Town	16
Net Area of ground occupied by Buildings in the Southern and Northern Divisions	16
Average Area occupied by Buildings and of mean space allowed to each person in each Sub-division	17
Area occupied by Fort William	17
Population of Fort William	17
Proportion of Males to Females in Fort William	17
Classification of the Population, according to Ages	18
Area occupied by Coolie Bazar	18
Population of Coolie Bazar	18
Proportion of Males to Females in Coolie Bazar	19
Classification of Population in Coolie Bazar, according to Ages	19
Average Area occupied by buildings, and mean space allowed to each person in Coolie Bazar	19
Population on board of European Ships in the Port	19
Classification of Population in the Port, according to Ages	20
Population on board of Native Crafts in the Port	20
Classification of Population in the Port, according to Ages	20
Population of the Jail and House of Correction	21
Classification of Population in the Jail, according to Nationalities	21
Proportion of Convicts to entire Population in the Jail	21
Total Population of Calcutta, including the Town, Fort William, the Jail, and the Port	22
Proportion of Males to Females	22
Classification of Male Population, according to Ages	22
Classification of European Population, according to Ages	23
Increase in number of Buildings	24
Test of approximate correctness of Census	24
Comparison with former Census	25
Fluctuating Population of the Town	25
Number of Establishments licensed to retail Spirituous Liquors and Intoxicating Drinks	27
Mortality in 1865	27
Mortality among Europeans	28
Comparative number of Births and Deaths	28
Summary of principal Facts obtained by the Census	28

REPORT
ON THE
CENSUS OF CALCUTTA
FOR
THE YEAR 1866.

THE Justices of the Peace for the Town of Calcutta having determined upon taking an account of the population of this city, a Committee was appointed consisting of the gentlemen named in the margin, for the purpose of devising arrangements for carrying out the objects in view, in accordance with the provisions of Sections 101 to 108 of Act VI. of 1863, B. C.

The Chairman.
Vice Chairman.
Dr. Norman Chevers.
Manookjee Rustomjee, Esq.
Moulvie Abdool Luteef
Khan Bahadur.
Ramanauth Tagore, Esq.

2. Before fixing upon any definite plan of action, the following points had to be taken into due consideration :

1st.—The general impression which prevailed amongst the lower classes of Natives, that the object of the Census was the imposition of some new tax.

2nd.—The comparative large number of Natives, ignorant of reading and writing.

3rd.—The variety of languages spoken by the Native population.

4th.—The reticence on the part of Natives to afford information regarding female inmates.

5th.—The agency to be employed in taking the Census of the Town without the interference of the Police.

6th.—The form of Return, which, whilst affording the required information, would best be suited to the habits and understanding of the Natives, and not interfere with their religious and domestic rights.

3. From the information which reached the Chairman, it became clear, that any attempt at even an approximate enumeration of the existing population would prove futile, unless the Native mind was first disabused of the erroneous impressions which seemed to exist with regard to the real objects of the Census. It appeared that this very necessary measure might best be effected by inviting the co-operation of all the Native Justices, they explaining to the inhabitants of the Town the advantages resulting from the taking of the Census, and assuring

them that there was no intention whatever of imposing new taxes. Moulvie Abdool Lutceef and Baboo Ramanauth Tagore, Members of the Census Committee, accordingly drew up the following paper:

CENSUS FOR 1866.

Under the provisions of Act VI. of 1863, the Chairman of the Justices is about to take a Census of Calcutta. Computers will visit every house within the Town on an appointed day, with a view to obtain an account in writing of the name, sex, age, caste, nationality, and occupation of all persons residing therein. In respect of females, the name and age will not be enquired.

As the object of the Census may be misapprehended, we have much pleasure in explaining to you its advantages.

I. The Census will show the total number of the population in the Town, and how they are employed. It will also give a correct idea of the professions followed and their respective strength, and thus help persons in ascertaining the demand of particular professions in the Town.

II. With the aid of the Census, the number of the vagrant population within the Town may be devised to provide occupation for them.

III. Educationists and Philanthropists will glean from the Census the number of children fit for instruction in the Town, and the means already in existence for their education. If any gross disparity exists, they may direct their attention to the benevolent task of educating the poorer classes, such as are destitute of all means to provide education for their children.

IV. The charitably-disposed may find a wide scope for their charity by knowing the true extent of destitution and distress in the Town. If each caste could know how many persons belonging to it were unable to support themselves, the well-to-do and prosperous numbers might, from an enlightened clan-feeling, initiate movements for the maintenance of such unfortunate persons. Arrangements have been made by the Justices of Calcutta to obtain returns of births and deaths in the Town. If a true account of the population were also obtained, the percentage of mortality among the inhabitants might be ascertained, and should, at any time, the death-rate appear to be excessive, measures might be adopted to prevent such unusual mortality.

Such are in brief some of the advantages of a Census. We have been assured by the Chairman that in taking it there is not the remotest intention to impose a fresh tax on the inhabitants, to interfere with their religion, or in any way to harass them. We, therefore, earnestly recommend our countrymen to respond to the call which he proposes to make for the purpose of obtaining a Census of the population of the Town, by furnishing the particulars required by law.

4. Though this address did not exactly coincide with the views of the European Justices, yet it was adopted on the ground that the Native Justices naturally best knew what would suit the understanding of the poorer classes, and the paper was, therefore, translated into Bengalee and Hinddee, and printed copies thereof were forwarded to each of the Native Justices, with the following letter from the Secretary:

I am directed by the Chairman of the Justices to forward herewith * * * copies of a paper prepared by the Census Committee, explanatory of the objects for which the Census is to be taken, and the beneficial results expected to be obtained therefrom.

The Chairman will feel much obliged if you will kindly sign the above papers, in conjunction with some other Justice in your neighbourhood, and cause them to be distributed among the Native residents of the Town.

The importance of a Census of the population cannot be sufficiently urged upon the public; but as, in order to ensure correctness of returns, the co-operation of all the residents of the Town is absolutely necessary, the Chairman will esteem it a favor, if you will promulgate among all classes of the Bengalee community the special object for which an account of the population is taken, and particularly impress upon every inhabitant the assurance, that in taking the Census, there is no intention whatever of either interfering with the rights or religion of any one, or of imposing new taxes.

5. The same paper was likewise translated into Nagree, and Moulvie Abdool Luteef took particular care to distribute copies thereof among the Mahomedan residents of the Town; and, moreover, published an excellent discourse on the subject.

6. In addition to the foregoing measures, notice of the intended Census and its objects was promulgated by beat of drum, so that every possible means had been adopted to afford full explanation to such of the lower classes of the Native community as could not read or write.

7. The next point to decide was the manner in which the Census was to be taken, and the agency to be employed for that purpose. Considering the strong aversion of the poorer classes towards Native Policemen, it was very desirable to avoid any interference on the part of the Police, and it also became necessary to make special arrangements with regard to the taking of the Census of Fort William and of the Shipping in the Port, so as to prevent any clashing with the authorities, in whom the control of the Fort and of the Port is, respectively, vested. Under these circumstances, a distinct plan of action had to be devised for taking an account of—

1st.—The fixed population of the Town.

2nd.—The number of vagrant persons.

3rd.—The population of Fort William.

4th.—The population of Coolie Bazar.

5th.—The floating population on board ships.

6th.—The floating population on board of dinghees.

7th.—The population of the Jail and the House of Correction.

8. After due consideration, it appeared that the best, and in fact the only practicable, way to carry out the objects in view was the appointment of special paid enumerators, who would be guided by certain rules, and would be specially trained for the work to be performed by them. It also appeared important that such enumerators should be selected from amongst persons residing in the locality of the population of which they were to take an account, so that they might be personally known to the residents, and thus more readily obtain the desired information, it being, moreover, a condition that each enumerator should be able to speak and write the language of the people of the particular locality to which he was to be attached. It was, likewise deemed advisable, that only such persons should be appointed enumerators as could give satisfactory references as to their identity and character.

9. Some difficulty was, however, experienced in forming even an approximate estimate of the probable number of enumerators required for the occasion. In the absence of all information as to the aggregate number of inhabitants of the Town, of the number speaking a particular language, and of the number of those who can neither read nor write, there was actually nothing to guide, and yet this information was of considerable importance, considering that the Census of the Town was to be taken within one night.

10. This difficulty was at last overcome by the adoption of a plan, which, whilst in a great measure affording the desired information, would, at the same time, furnish further details intimately connected with the statistics of the Town. This plan consisted in the preparation of street lists, which were to be made out from the Assessment Books of the Justices, and would thus contain an exact description of each building and tenement in each street, according to numbers. With these lists the enumerators would proceed through the streets to which they refer, and record on them the following particulars :

1st.—Whether any alterations or additions have been made to the tenement beyond what it is described in the lists.

2nd.—Whether inhabited or not.

3rd.—Whether any of the inmates can read and write, and what language.

4th.—The number of huts comprised in tenanted land entered in the assessment books under one number only.

5th.—Any new building that may have been erected and which is not entered in the Assessment Books, with the above details.

11. This arrangement appeared to be attended with the additional advantages that it would ensure a certain amount of correctness, as the enumerator would be compelled to return those lists duly filled up with the required particulars, which would afford an undeniable proof that he has made the necessary enquiries. The information thus obtained would furnish the following particulars :

a.—The number and description of buildings, tenements, &c., in each street.

b.—The number of dwellings, the inmates of which can read and write.

c.—The language in which they can read and write.

d.—The number of dwellings, the inmates of which can neither read nor write.

e.—The language which such people generally speak.

12. With a view to avoid any inconvenience to parties, and to prevent unnecessary inquisitiveness on the part of the enumerators, it was decided that blank Returns should be left with all those who could read and write, and that *visà voce* statements should only be taken in dwellings the inmates of which could neither read nor write. The Returns of the street lists with the remarks of the enumerators thereon, would show at once—

1st.—The number of dwellings at which mere blank Returns should be left.

2nd.—The language in which such Returns ought to be printed.

3rd.—The number of dwellings in which it would be necessary to take *visà voce* statements.

4th.—The language in which such depositions will have to be taken.

13. As the street lists would be filled up by the enumerators at least ten days previous to that fixed upon for taking the Census, there would be ample

time for the distribution of the blank Returns, and then would be seen at a glance the exact number of dwellings in which it would be necessary personally to collect information, and thus the precise number of enumerators required for that particular purpose could easily be ascertained.

14. The next point for consideration was, the form of Return which parties would be called upon to fill up. Though, as regards the real benefits which were to result from the taking of the Census, it was, undoubtedly, of importance to combine as many statistics of the Town as possible, yet, considering the novelty of the undertaking, the suspicion that existed as to its scope and purposes, and the natural reluctance of the lower classes to afford information, it would have been unsafe to attempt too much, and it became evident that the simpler the form of Return, the more reliance might be placed on its correctness. Two of the Members of the Census Committee very kindly undertook to prepare a form which they thought would suit the habits and understanding of the Native community, but, on due consideration, the form was deemed too complicated, and, if adopted, would have led to much confusion, and greatly enhanced the work of the enumerators, who, as a matter of necessity, had to be selected from the Native classes, and who themselves had to be initiated in the duties to be performed by them.

15. It was likewise argued, that although Section 106 of Act VI. of 1864 gave the Justices the power to call for duly-filled-up Returns, this provision of the law could not be enforced, because no penalty was attached to a non-compliance therewith. It was, therefore, infinitely better to secure the friendly co-operation of the inhabitants, and to obtain from them voluntarily the information, which could not be rendered compulsory. It is true, that in that case the Returns may, in several instances, be somewhat defective, but such errors or omissions might be corrected by re-enquiry, and, in the aggregate, they would be sufficiently accurate to form a correct estimate of the actual population of the Town.

16. Another difficult task was the arrangement of nationalities. It would have been almost impossible to draw the exact line of demarkation between Europeans and their descendants, and any attempt of this sort might often have led to unnecessary irritation of feelings, and caused much dissatisfaction. It was, therefore, determined to classify the inhabitants as follows :

Europeans, being those of unmixed parentage.
Indo-Europeans, ditto mixed ditto
Asiatics, ditto Native Christians.
Hindoos, according to caste.
Mahomedans, and
Negroes and Africans.

17. Bearing all the foregoing considerations in mind, a form of Return was prepared (*vide* Appendix No. 1). which embraced the following details :

Name of male inhabitants above	{	Member of the Family.
10 years of age		Servants.
...		Visitors and others.

Country and place of birth.

Age.

Race or Caste.

Occupation.

Children under 10 years of age ...	{	Male.
		Female.
Female inhabitants above 10 years of age ...	{	Members of the Family.
		Servants.
		Visitors and others.

With regard to female servants, they were to be entered as Europeans, Portuguese, Mahomedans, or Hindoos, as the case may be.

18. To facilitate the filling up of such Returns, an example of a form filled up was attached to each blank Return (*vide* Appendix No. 2), and it was likewise determined that both the blank Returns, as well as the examples filled up, should be translated into Bengalee, Oordoo, and Nagree, and that such a number of copies should be printed of each, as, after the completion of the street lists, may appear necessary.

19. Having thus determined the nature of form to be used, it became necessary to frame special instructions for the guidance of the enumerators, and the following rules were drawn up accordingly:

RULES FOR THE ENUMERATORS FOR TAKING THE CENSUS OF THE TOWN OF CALCUTTA.

1. **STREET BOOKS.**—A list or book to be prepared for each street separately, containing the number and description of each building, tenement, hut, &c., contained within the said street. This list will be prepared from the Assessment Books, of which, in fact, it will be a copy, with the omission of the owner's name and of the value of the property.

2. The enumerator will proceed with such a list through the street to which it refers, and call at each tenement to ascertain the following particulars:

(a.) Whether any additions have been made to the tenement beyond what it is described in the list.

(b.) Whether inhabited or not.

(c.) Whether any of the inmates can read and write, and in what language.

(d.) The number of huts comprised in tenanted land entered in the Assessment Book under one number only.

(e.) Any new building that may have been erected and which is not entered in the Assessment Books, with the above details.

3. There will be no occasion to enter all the above particulars in the list, because one single entry will, in most cases, explain the others. For instance, if a house be uninhabited, it will be quite enough to record the word "empty," as such will shew that there is no one living in it, and consequently no one to read or write.

4. Where a tenement is inhabited, and some one of the inmates can read and write, it will be quite sufficient to record only the language in which he can read and write, for instance, B. "Bengallee," P. "Persian," O. "Oordoo."

5. Where occupiers of tenements cannot read or write, the enumerator, after ascertaining what language the inmates speak, will record in his list, cannot read "Bengallee," or "Oordoo," or whatever the language of the people may be.

6. Where a house is uninhabited, but a Durwan or some other servants in charge, the record in the enumerator's list will be Durwan only, "or two bearers," or whatever the case may be, and he will, on the day fixed for taking the Census, fill in the particulars of age, &c., as required by the Return.

7. If there be any alteration, that is, either addition to or reduction of a building, the record will simply be, "second story added," or "upper story pulled down," or whatever the case may be. Form A. shews in red ink the different entries as required.

8. PREPARATION OF RETURNS.—Each enumerator will send to the Office such of the street lists as have been filled up by him according to the above Rules on the previous day. The writers at the Office will then prepare the blank Returns for each of the houses, the inmates of which can read and write, and in the language noted. These Returns will bear on the outside the number of the premises, and be made up in bundles for each street separately. These bundles will afterwards be returned to the enumerator, who, on re-passing through the same street, will leave the blank Returns at the premises indicated on the back of the Return, with a request that the same may be filled up according to the specimen form attached thereto.

9. The writers at the Office will prepare for each street another bundle containing blank Returns for such premises, the inmates of which can neither read nor write. Each Return will be in the language of the people, and bear outside the number of the tenement, hut, &c., to which it refers.

10. These bundles will be made over to the enumerator, who, on the day appointed for taking the Census, will proceed to each of the premises to which the Return refers and fill up the required details.

11. These Returns, duly filled up, will be handed over to the writers at the Office on the following day, and the enumerators will then proceed to collect the blank Returns which have been left with people who can read and write to be filled up.

12. When all the Returns have been collected, they will be handed to the writers at the Office, who will therefrom compile such tables of the whole population of the town as may be required hereafter, and containing all the details given in the Returns, but in the aggregate number.

13. To the tables mentioned in paragraph 12, will be added the Returns of the floating population of the Port, as well as of the residents of Fort William and of Coolie Bazar, for the Census of which special arrangements will be made in accordance with the foregoing Rules.

20. Before, however, any of these arrangements could be finally adopted, it was necessary under Section 102 of Act VI. of 1863, to submit the proposed form and instructions for the approval of His Honor the Lieutenant-Governor of Bengal, and the following letter was accordingly addressed to the Secretary to the Government of Bengal, on the 21st of October 1865:

The Justices having determined to take an account of the population of Calcutta during the current year, the Chairman obtained the appointment of a Committee to aid and advise him as to the measures to be taken for that purpose, in order that any unnecessary interference with the feelings and prejudices of the Native communities might be carefully avoided in regard to the form of Schedule which would be required to be filled in by the residents.

2. Having consulted the Committee, the Chairman proposes to adopt the Form of Schedule herewith annexed, to which I am directed to request that you will obtain the sanction of His Honor the Lieutenant-Governor, in accordance with the provisions of Section 106 of Act VI. of 1863.

3. As this will be the first Census taken under the authority of law in Calcutta, it has been considered expedient to draw out the Schedule in the simplest form compatible with the requirements of the law, the conditions of which are met by the form which it is proposed to adopt, and to postpone, to a future occasion, the issue of more elaborate Returns, when the misapprehension which, there, is reason to believe, is entertained by the more ignorant classes as to the object for which the Census is taken has been proved groundless, and when, therefore, the correct filling in of such Returns can be enforced by a penalty, for, it will be observed, that under the Act above quoted, no penalty is prescribed for omission or neglect to afford the information called for in the Schedule.

4. I am further directed to request that His Honor the Lieutenant-Governor will, under Section 108 of Act VI. of 1863, sanction the use of the services of the Police to obtain Returns of the particulars required by that section "with respect to all houseless persons, and all persons who, during the night preceding the day to be appointed, were on night duty, or, for any other reasons, were not abiding in any house of which account is to be taken by the enumerator."

5. A draft of the instructions for the guidance of the enumerators is herewith submitted for the approval of His Honor the Lieutenant-Governor, in conformity with Section 102 of Act VI. of 1863.

6. Similar forms and instructions will be adopted with regard to the floating population of the Port and the population of Fort William, the Census of which it is proposed to take in co-operation with the Military authorities and with the assistance of the Master Attendant and the Collector of Customs.

To the above the following reply was received :

I am directed to acknowledge the receipt of your letter No. 979, dated 21st ultimo, and in reply to state, that the Lieutenant-Governor sanctions the Form of Schedule proposed to be adopted by the Justices of the Peace for the Town of Calcutta, in taking a Census of the population of Calcutta during the current year.

2. His Honor at the same time sanctions the use of the services of the Police in obtaining Returns of the particulars required by Section 108 of Act VI. of 1863, and approves of the proposed instructions for the guidance of the enumerators.

3. The proposed measures for taking a Census of the floating population of the Port and the population of Fort William are also approved, and the Officer Commanding the Presidency Division, the Master Attendant, and the Collector of Customs will be requested to afford the necessary assistance to the Justices of the Peace.

21. Immediately on the receipt of the Government sanction, the Chairman placed himself in communication with Major Lamb, Garrison Quarter Master, Capt. Reddie, Master Attendant, the Collector of Customs, and the Commissioner of Police, with a view of making arrangements for taking, simultaneously, an account of the population of Fort William and Coolie Bazar, of the floating population of the Port, and of vagrant and houseless persons.

22. As an uniform plan of action would facilitate the work, the same form of Return has also been adopted for the Fort and Coolie Bazar. As Major Lamb very kindly undertook to furnish Returns of the Fort and Military Barracks at Coolie Bazar, the task of the enumerators became easy, and it was arranged that they should proceed in exactly the same manner, and according to the same rules as were laid down for the Town of Calcutta.

23. Arrangements were entered into with the Master Attendant, regarding the floating population in the river, and the following rules were agreed upon :

a.—The Census to be taken only of ships lying between Hastings' Bridge, and the Chitpore Canal Gate to the north of the Town, but to include all vessels, whether moored on the Calcutta or Howrah side of the river.

b.—The Master Attendant to issue a circular to all ships commanded by Christian Captains, &c., intimating that it is the intention of the authorities to take a Census of the floating population of Calcutta, and that each commander is, for that purpose, appointed an enumerator for his own ship, under the provisions of Section 107 of Act VI. of 1863.

c.—Each Commander would, at the same time, be furnished with a blank return, and with a form filled up, and he would be requested to enter in the Return the names and particulars (as shown in the different columns) of every person, that may be on board his ship on the night on which the Census is to be taken.

d.—The Return duly filled up, signed by the Commander or, in his absence, by the officer in charge of the ship, and countersigned by the Preventive Officer on board (if there be any), to be forwarded to the office of the Master Attendant, on the day following that appointed for the taking of the Census.

24. A special form of Return was prepared for the shipping, and the Collector of Customs was requested to issue orders to the Preventive Officers with reference to their countersignature of the Returns. Copy of the form will be found in Appendix No. 3.

25. The only means of obtaining an account of the floating population on board of Native crafts and of dinghees, was through the Native crafts and dinghees. River Police. Arrangements were, therefore, made by the Commissioner of Police for the appointment of special enumerators, who were to be supplied with English and Bengalee blank Returns, and had to visit every craft in the river. Where the Naccoda or Tindal could read and write, mere copies of blank Returns were to be left, the enumerator explaining verbally the manner in which such Returns were to be filled up. But with regard to such native vessels, where no one was on board who could read or write, as well as with regard to dinghees, the enumerators were to re-visit them on the night appointed for taking the Census, and collect all the necessary information to enter it in the Returns.

26. The Commissioner of Police was likewise requested to make arrangements for obtaining Returns of all houseless persons, and Vagrant persons. of all persons who, during the night preceding the day to be appointed, were on night-duty, or, for any other reasons, were not abiding in any house of which account was to be taken by the enumerators.

27. The Superintendent of Jail was appointed an enumerator for the Jail and House of Correction, and to be supplied with the necessary number of forms in English and Bengalee.

28. All the foregoing arrangements having been agreed upon, a special office was opened at the Bonded Ware-house, and a number of Native writers engaged, who were to be trained for their work, and whose first duty was to collect the information mentioned in paragraph 10 of this Report. Dr. Francis, Auditor of Medical Accounts, having very kindly consented to place the services of his Head Assistant, Baboo Gobind Chunder Dhur, at the disposal of the Justices, the street lists were at once distributed among two hundred writers, who, with the assistance of the assessing sircars, were set to work in collecting the prescribed information within the Town, the Fort, and at Coolie Bazar.

29. From the Returns furnished by them, it was computed, that the following number of blank Returns and of filled-up examples would be required, viz.:

Blank English Returns	25,000
Ditto Bengalee ditto	50,000

Blank Oordoo Returns	30,000
Ditto Nagree ditto	5,000
Examples of English Form for Europeans	...			15,000
Ditto ditto " Natives	...			40,000
Ditto Bengalee " ditto	...			40,000
Ditto Oordoo " ditto	...			30,000
Ditto Nagree " ditto	...			5,000

and they were, therefore, ordered to be printed at once. There were likewise ordered 1,200 copies of the Rules for the guidance of enumerators, in English and Bengalee.

30. As soon as the above papers were received from the printers, as well as copies of the forms required by the Master Attendant and the Commissioner of Police, they were distributed to the various Departments, with an intimation that the night of the 8th January was fixed upon for taking the Census, and the several persons engaged on the task were requested to make their arrangements accordingly.

31. From the information recorded in the street lists, was computed the number of blank Returns and filled-up Forms, as well as the language in which required, that would have to be left at the dwellings of persons who could read and write, and accordingly the distribution of these Returns commenced on the 2nd of January, and was completed within five days.

32. From the same street lists was also seen the number of dwellings in which it would be necessary to take the *visá voce* depositions of the inmates, and, on calculation, it was found that 220 enumerators would be quite sufficient for the task. The number, therefore, employed for that particular purpose, consisted of

50 Enumerators speaking, reading, and writing Persian and Nagree.

60 ditto ditto English and Bengalee.

110 ditto ditto Bengalee and Hindustani.

33. To disperse any misapprehensions which might still exist as to the objects of the Census, the co-operations of the Press, European and Native, was invited, and the following appeal to the public was printed and circulated with all the English and most of the Native Papers.

CENSUS FOR 1866.

THE Justices of the Peace for the Town of Calcutta having decided upon taking the Census of the population of this Town, including that of Fort William, Coolie Bazar, and the Shipping in the river, the Chairman invites the hearty co-operation of the inhabitants of Calcutta in this important undertaking.

The Census will be taken on the night of Monday, the 8th January, 1866, and it is particularly requested that in filling up the Returns, the names and other particulars of such persons only may be entered as are actually residing on the night of the 8th of January on the premises.

Wherever the inhabitants (or any one of them) of any house, hut, or tenement, can read and write, the enumerator will leave, a few days previous to that on which the Census is to be taken, blank

Returns and Forms, either in English, Nagree, Bengali, or Oordoo, as the case may be; and only in such dwellings as may be occupied by people who can neither read nor write, will the enumerator call on the night of the 8th January and take the *virâ voce* deposition of the head of the tenement as to the number, &c., of the people residing within it.

• As all and every expense connected with the taking of the Census is defrayed by the Justices, no FEE whatsoever is to be paid by, or to be demanded from, any of the residents or non-residents of the Town. The enumerators have been strictly enjoined to conduct themselves with propriety and forbearance towards every one, and confine their enquiries to the particulars required by the printed forms of Returns.

The Chairman will feel obliged, if any deviation from these rules on the part of the enumerators, or any attempt to obtain fees of any kind whatsoever, be at once brought to his notice.

• The same notice was promulgated by the Commissioner of Police by beat of tom-tom throughout all parts of the Town.

34. Everything being thus set in train, the enumerators began their work at 7 o'clock on the night of the 8th January, and completed their task by 2 o'clock in the morning, commencing to call for the Returns on the day following. To prevent imposition, each enumerator was provided with a special certificate.

35. But although the distribution of Returns occupied no more than five days, it took more than half a month to collect them. This delay, however, chiefly occurred in the European part of the town, owing to most of the residents being absent from home at the hour the enumerators called, and it was, therefore, necessary to set apart three special mornings, on which the enumerators had to call for the Returns between the hours of six and ten.

36. With the street lists in hand, it was easy to ascertain whether a Return had been furnished for each dwelling, either by the occupiers or the enumerator, and fifty writers were specially engaged for the purpose of checking the Returns. Whenever Returns were not forthcoming, the enumerators were called upon for an explanation, and they were ordered to call upon the parties and obtain the necessary information.

37. The enumerators having reported that they found 149 houses quite deserted and locked up on the night of the Census, were directed to revisit the same a week after and report the result of their enquiries. It turned out that the inmates of 98 houses had actually left town on that day to avoid the Census, but had returned on the following morning. As they were permanent residents of the town, their statements were taken by the enumerator on the occasion of his revisiting the house, and embodied with the Returns of the streets to which referring.

38. After it was ascertained that Returns had been received for every house, tenement, and hut, and these had been arranged according to streets, the writers were instructed to extract and collate the various details with the view of preparing the several statistical tables in which the results of the Census were to be exhibited. Here, however, the real difficulty of the work began. On examination it was found that a very large number of the English Returns were

defective in the required details, and the enumerators had, in many instances, to call on the parties to rectify the omissions. With regard to Returns in the Vernaculars, it was in very many cases most difficult to decipher the writing, whilst in many Returns the entries were so confused as to be of no use whatever. Under these circumstances, the enumerators had to go on a second round to get the Returns corrected, and it was not until the 18th of February that the preparation of the statistical tables could be commenced upon.

39. Though, as far as an account of the population of the town is concerned, the Census may be considered as correct, it is apprehended that implicit reliance cannot be placed on the Tables showing the different ages of the people, for among the lower Native classes, there is hardly one in ten who is able to state his actual age, and in many cases the enumerators had to take it upon themselves to record such age as, from enquiries and circumstantial evidence, appeared to them near the truth.

40. It was in contemplation to take in connection with the Census an account of the number of lepers, insane, deaf, dumb, and blind, but on due consideration the idea was abandoned, because from the information obtained regarding the particular objection which Natives have to afford information on that subject, especially with regard to lepers, it was feared that any attempt of the above kind would be looked upon as an interference with private rights of the inhabitants, and might thus be found considerably obstructing the work of the enumerators.

41. As, with reference to a variety of circumstances, it may hereafter be desirable to have separate statistics for the Fort, Coolie Bazar, and the Shipping, separate Census Tables have been prepared for each accordingly, and will be adverted to in the course of this Report.

POPULATION.

42. By Section 2 of Act VI. of 1863, the Town includes all places within the local limits of the ordinary original civil jurisdiction of Her Majesty's High Court of Judicature at Fort William in Bengal. It is bounded on the north by a line a little to the south of the Chitpore Canal, on the east by Circular Road, on the west partly by the River Hooghly, and on the south by the Mahratta Ditch and Tolly's Nullah Canal, and occupying an area of 15,115 biggahs, 8 cottahs, 10 chittacks and 27 feet, equal to 7.80755843 miles, which, however, includes Fort William, the Maidan with its enclosures, Coolie Bazar, and Tolly's Nullah, west of Alipore Bridge.

43. Of this area, 789 biggahs, 17 cottahs, 12 chittacks, and 33 feet are taken up by public and private tanks and by public squares, the remainder being traversed by 473 streets and lanes, aggregating 125 miles, 3 furlongs, 8 poles, and 7½ feet.

44. Deducting the area occupied by the Fort, the Maidan, Coolie Bazar, and Tolly's Nullah, the actual space over which the Town extends, is 10,958 biggahs, 9 cottahs, 8 chittacks, and 44 feet,* of which are taken up—

	<i>Biggahs.</i>	<i>Cottahs.</i>	<i>Chittacks.</i>	<i>Feet.</i>
By public and private tanks and squares...	549	1	8	30
By public roads and lanes	1,463	13	8	40
By places of Worship	93	5	1	15
By burial-grounds	32	12	2	24
Total	2,138	12	5	19

leaving 8,814 biggahs, 17 cottahs, 3 chittacks, and 25 feet as the area actually available for buildings, compounds, &c., and containing—

1	5-storied House.
26°	4-storied Houses.
999	3-storied ditto.
7,677	2-storied ditto.
7,272	1-storied ditto.
42,917	Huts.

58,892 tenements, which, on the night of the Census, were occupied by 3,54,874 human beings, of which—

6,690	were Europeans.
10,855	„ Indo-Europeans.
30	„ Greeks.†
703	„ Armenians.
1,360	„ Asiatics.
681	„ Jews.
1,02,844	„ Mussulmans.
98	„ Parsees.
2,31,206	„ Hindoos.
38	„ Africans.
369	„ Chinese.

3,54,874 in all, from which it follows, that the average area occupied by buildings, is 2 cottahs, 15 chittacks, and 13 feet, and the mean space allotted to each person, 25 yards and 2 feet square.

45. Of the total area for buildings, compounds, &c., as shown in para. 44, 5,570 biggahs, 11 cottahs, 11 chittacks, and 43 feet constitute the Northern, and

* A biggah is equal to 90 cottahs, and 1 cottah, or 16 chittacks, = 720 square feet.

† These born in Europe, have been included among Europeans.

3,244 biggahs, 5 cottahs, 7 chittacks, and 27 feet the Southern Division of the Town, being respectively peopled as follows:

		<i>Southern Division.</i>	<i>Northern Division.</i>
Europeans	5,530	1,160
Indo-Europeans	7,096	3,759
Greeks	16	14
Armenians	350	353
Asiatics	722	638
Jews	0	681
Mussulmans	48,783	54,061
Parsees	7	91
Hindoos	50,395	1,80,811
Africans	24	14
Chinese	161	208
Total	<u>1,13,084</u>	<u>2,41,790</u>

And lodged in—

5-storied House		1
4-storied Houses	4	22
3-storied ditto	235	764
2-storied ditto	1,900	5,777
1-storied ditto	2,128	5,144
Huts	11,797	31,120
Total	<u>16,064</u>	<u>42,828</u>

46. The above aggregate population comprises:

	<i>Males.</i>	<i>Females.</i>	<i>Boys.</i>	<i>Girls.</i>
Europeans	2,900	2,248	780	812
Indo-Europeans	3,975	4,175	1,311	1,394
Greeks	17	7	2	4
Armenians	291	238	88	86
Asiatics	712	405	120	123
Jews	240	228	111	102
Mussulmans	56,499	28,156	9,478	8,711
Parsees	73	15	6	4
Hindoos	1,12,560	78,305	20,763	19,578
Africans	24	9	2	3
Chinese	338	0	31	0
Total	<u>1,77,629</u>	<u>1,13,786</u>	<u>32,642</u>	<u>30,817</u>

being 2,10,271 males and 1,44,603 females, including boys and girls under 10 years of age.

47. The foregoing shows the following proportions in the number of males
----- females:

Europeans	118.62 males to 100 females.
Indo-Europeans	94.91 " 100 "
Greeks	172.72 " 100 "
Armenians	116.97 " 100 "
Asiatics	157.57 " 100 "
Jews	106.36 " 100 "
Mussulmans	178.95 " 100 "
Parsees	415.78 " 100 "
Hindoos	136.20 " 100 "
Africans	216.66 " 100 "

Giving a general average proportion of 145.41 males to 100 females.

48. As under the provisions of Section 105 of Act VI. of 1863, no account is to be taken of either the names or ages of females, no general table of the ages of the population could be prepared, but as, at the same time, it was desirable that some sort of information should be collected, which, at all events, would show the proportion of children to the adult population, a column was introduced in the returns for "girls under 10 years of age," and of these only the total number was to be given for each premises. The proportion of children of both sexes under 10 years of age to the adult population of the town, is as follows:

Europeans	29.95 per cent.
Indo-Europeans	33.19 "
Greeks	25.00 "
Armenians	32.89 "
Asiatics	21.76 "
Jews	45.51 "
Mussulmans	21.49 "
Parsees	11.36 "
Hindoos	21.13 "
Africans	15.15 "

Giving a proportion of 21.77 on the whole population.

49. With regard to males, all under 10 years of age have been grouped into one class, as "boys under 10 years of age," whilst adults were computed at progressive ages at intervals of five years. This arrangement shows the following results:

Boys under 10 years of age	32,642
Adults from 10 to 15 years	10,749
Ditto 16 " 20 "	20,964
Ditto 21 " 25 "	29,372
Ditto 26 " 30 "	32,656
Ditto 31 " 35 "	21,610

Adults from 36 to 40 years	25,717
Ditto 41 „ 45 „	11,761
Ditto 46 „ 50 „	11,191
Ditto 51 „ 55 „	4,352
Ditto 56 „ 60 „	4,968
Ditto 61 „ 65 „	1,705
Ditto 66 „ 70 „	2,584

50. Comparing the number of tenements and their inhabitants of the Southern and Northern Divisions with the respective area, it follows, that whilst in the Southern Division the average space occupied by a tenement is 4 cottahs, 0 chittack, and 28 feet, and the mean area for each person 9 chittacks, and 8 feet, it is in the Northern Division only 2 cottahs, 9 chittacks, and 28 feet, and 7 chittacks and 17 feet respectively.

51. Of the 438 streets and lanes which intersect the Town, there are 185 in the Southern, and 253 in the Northern Division, extending in length to 2,28,695 feet and 3,50,083 feet respectively. The area taken up by them being 705 biggahs, 4 cottahs, 9 chittacks, and 6 feet in the Southern, and 778 biggahs, 8 cottahs, 15 chittacks, and 34 feet in the Northern Division, it follows that the average breadth of the thoroughfares is 44.405 feet in the former, and 32.02 feet in the latter division.

52. But in order to form a correct idea of the density of the population, it is necessary to consider each Division of the Town separately. The following shows the respective area of each Division, as well as the net area allowed for buildings and compounds, after deducting the space occupied by public and private tanks, squares, roads, and lanes, places of worship, and by burial-grounds:

	GROSS AREA.				NET AREA.			
	<i>Biggahs</i>	<i>Cottahs</i>	<i>Chittacks</i>	<i>Feet.</i>	<i>Biggahs</i>	<i>Cottahs</i>	<i>Chittacks</i>	<i>Feet.</i>
1st Division	2,022	0	0	0	1,683	10	12	24
2nd ditto	2,695	2	11	24	2,192	16	8	24
3rd ditto	2,092	10	0	24	1,694	4	6	40
4th ditto	1,710	5	9	40	1,348	18	7	20
5th ditto	2,433	11	2	46	1,895	7	0	7
Total ...	10,953	9	8	44	8,814	17	3	25

53. The 1st, 2nd, and 3rd constitute the Northern, and the 4th and 5th the Southern grand Divisions of the Town. They are generally called the European and the Native part of the Town.

54. Comparing the number of tenements in each Division with the area they occupy, and the latter with the number of persons residing within it, the following result is obtained :

<i>Average space occupied by Buildings.</i>					<i>Mean space allowed to each Person.</i>	
1st Division	2 Cottahs,	12 Chittacks,	24 Ft.	2 Chittacks,	& 40.65 Sq. ft.	
2nd ditto	2 ditto	8 ditto	20 do.	2 ditto	15.38 ditto.	
3rd ditto	2 ditto	7 ditto	28 do.	2 ditto	5.97 ditto.	
4th ditto	3 ditto	1 ditto	27 do.	3 ditto	36.719 ditto.	
5th ditto	5 ditto	0 ditto	4 do.	5 ditto	16.28 ditto.	

In reality, however, the mean space allowed to each person, computed upon the superficial area of the Division must be less, as the foregoing calculation does not include the space occupied by a large number of animals, such as horses, bulls and cows, goats, sheep, &c.

55. The area occupied by Fort William is 521 biggahs, 7 cottahs, 3 chittacks, and 32 feet, and contained on the night of the 8th January, the following population :

2,032 Europeans,*
 18 Indo-Europeans,
 16 Asiatics,
 374 Mussulmans, and
 1,438 Hindoos.

Total ... 3,878 Persons,—classified as follows :

		<i>Males.</i>	<i>Females.</i>	<i>Boys.</i>	<i>Girls.</i>
Europeans	...	1,687	167	97	81
Indo-Europeans	...	8	9	1	0
Asiatics	...	12	4	0	0
Mussulmans	...	321	43	5	5
Hindoos	...	1,211	130	56	41
Total	...	3,239	353	159	127

56. The above shows the following proportion in the number of males and females :

Europeans	719.35 males to 100 females.
Asiatics	300.00 ditto 100 ditto.
Mussulmans	679.17 ditto 100 ditto.
Hindoos	740.94 ditto 100 ditto.

* This includes Soldiers.

50158

57. Classifying the male population according to ages, the following result is obtained:

Boys under 10 years of Age	159
Adults from 10 to 15 years	66
Ditto 16 „ 20 ditto	240
Ditto 21 „ 25 ditto	695
Ditto 26 „ 30 ditto	1,255
Ditto 31 „ 35 ditto	464
Ditto 36 „ 40 ditto	326
Ditto 41 „ 45 ditto	91
Ditto 46 „ 50 ditto	47
Ditto 51 „ 55 ditto	22
Ditto 56 „ 60 ditto	20
Ditto 61 „ 65 ditto	9
Ditto 66 „ 70 ditto	4

58. Coolie Bazar, situated at the south-western extremity of the Town, extends over an area of 244 biggahs, 18 cottahs, 9 chittacks, and 41 feet. Of this are taken up—

		<i>Biggahs.</i>	<i>Cottahs.</i>	<i>Chittacks.</i>	<i>Feet.</i>
By public Roads	...	32	13	0	24
„ Tanks „	...	3	4	5	40
„ Places of Worship	..	5	1	6	33

Leaving 203 biggahs, 19 cottahs, 12 chittacks, and 34 feet as the ground actually occupied by buildings and their enclosures. It contains 48 puckah buildings and 658 huts, which, on the night of the 8th of January, were occupied by—

281 Europeans,
105 Indo-Europeans,
1 Asiatic,
1,221 Mussulmans, and
1,680 Hindoos.

3,238 in all, and classified as follows:

			<i>Males.</i>	<i>Females.</i>	<i>Boys.</i>	<i>Girls.</i>
Europeans	88	88	55	50
Indo-Europeans	42	33	12	18
Asiatic	1	0	0	0
Mussulmans	536	438	132	115
Hindoos	886	451	172	121
Total	1,553	1,010	371	304

59. The foregoing establishes the following proportion of males to females :

Europeans	103.62 males to 100 females.
Indo-Europeans	105.88 " " 100 ditto.
Mussulmans	120.79 " " 100 ditto.
Hindoos	184.98 " " 100 ditto.

60. The following is the classification of the male population according to ages :

Boys under 10 years of age	371
Adults from 10 to 15 years	74
Ditto 16 " 20 ditto	156
Ditto 21 " 25 ditto	269
Ditto 26 " 30 ditto	300
Ditto 31 " 35 ditto	171
Ditto 36 " 40 ditto	246
Ditto 41 " 45 ditto	86
Ditto 46 " 50 ditto	97
Ditto 51 " 55 ditto	29
Ditto 56 " 60 ditto	66
Ditto 61 " 65 ditto	21
Ditto 66 " 70 ditto	38

61. Comparing the number of buildings with the area of ground they occupy, and apportioning the latter to the number of residents, it will be found that the average area occupied by buildings is 5 cottahs, 12 chittacks, and 20 feet, and the mean space allotted to each person 1 cottah, 4 chittacks, and 7 feet.

62. In taking an account of the population of the Port, it was deemed advisable to limit the same to vessels lying between
The Port of Calcutta. Hastings' Bridge to the south and the Chitpore Canal Gate to the north, which are the boundaries of the jurisdiction of the Municipal Corporation. The returns show that, within that limit, there were in the Port, on the night of the 8th of January, 112 European sailing vessels, and 20 steamers, tugs, and flats, aggregating 1,18,256 tons burthen, and containing the following number of persons on board :

2,052	Europeans,
40	Indo-Europeans,
53	Asiatics,
36	Chinese,
14	Africans,
700	Mussulmans, and
29	Hindoos,
<hr/>	
2,924	In all.
<hr/>	

Comprising—		<i>Males.</i>	<i>Females.</i>	<i>Boys.</i>	<i>Girls.</i>
Europeans	...	1,996	28	21	7
Indo-Europeans	...	39	1
Asiatics	...	50	3
Chinese	...	36
Africans	...	14
Mussulmans	...	697	1	...	2
Hindoos	...	29
Total	...	2,861	33	21	9

63. Classifying the above male population, according to ages, the following result is obtained:

Boys under 10 years of Age	21
Adults from 10 to 15 years	64
Ditto 16 „ 20 ditto	517
Ditto 21 „ 25 ditto	759
Ditto 26 „ 30 ditto	666
Ditto 31 „ 35 ditto	325
Ditto 36 „ 40 ditto	238
Ditto 41 „ 45 ditto	133
Ditto 46 „ 50 ditto	90
Ditto 51 „ 55 ditto	40
Ditto 56 „ 60 ditto	22
Ditto 61 „ 65 ditto	5
Ditto 66 „ 70 ditto	2

64. The term “Native Crafts” includes all kinds of vessels in command of Natives, or bearing Native Flags. Of these, there were, on the night of the Census, 37 in Port, aggregating 25,021 tons burthen. To these have to be added the dinghees, bhurs, and other descriptions of river boats, the number of which amounts to 2,140.

65. The following is the number of persons enumerated on board:

16	Europeans,
4	Indo-Europeans,
5	Asiatics,
7,736	Mussulmans,
4,698	Hindoos, and
1	Chinese.

12,460 In all, comprising—

	<i>Males.</i>	<i>Females.</i>	<i>Boys.</i>	<i>Girls.</i>
Europeans	...	4	...	1
Indo-Europeans
Asiatics
Mussulmans	...	96	52	9
Hindoos	...	14	19	...
Total	...	114	71	10

66. Classifying the male population according to ages, the following result is obtained:

Boys under 10 years of age	71
Adults from above 10 to 15 years	381
Ditto " 16 to 20 "	1,959
Ditto " 21 to 25 "	2,768
Ditto " 26 to 30 "	2,845
Ditto " 31 to 35 "	1,874
Ditto " 36 to 40 "	1,719
Ditto " 41 to 45 "	362
Ditto " 46 to 50 "	510
Ditto " 51 to 55 "	83
Ditto " 56 to 60 "	176
Ditto " 61 to 65 "	18
Ditto " 66 to 70 "	70

67. It is but right to state, that the ages of Natives have, in this instance, been almost entirely computed from appearance and length of employment, for not one in a hundred could positively state his age; in fact some of them produced certificates from commanders of ships belonging to the late Hon'ble East India Company, which, from the date they bore, must have been granted to the grandfathers of the holders.

68. The details of the population of the Great Jail and House of Correction, will be found in Appendix, Table No. 28, of which the following is an abstract:

	Male.	Female.
Europeans	142	11
Indo-Europeans	14	0
Asiatics	6	0
Mussulmans	180	4
Hindoos	188	1
Africans	1	0
Chinese	3	0
Total	534	16

69. Leaving out the establishment attached to the Jail, the number of convicts bears the following proportion to the aggregate population of Calcutta of the respective principal Nationalities:

Europeans	... 1.32 per cent.
Indo-Europeans	... 0.13 ditto.
Asiatics	... 0.42 ditto.
Mussulmans	... 0.13 ditto.
Hindoos	... 0.07 ditto.

70. The enumeration of vagrant persons was to be undertaken by the Police, but as no return in that respect has been received, it is presumed that no vagrant persons were found in the streets on the night of the Census.

71. Summing up the populations of the Town, Fort William, the Jail, of Cobble Bazar, the Port, and of Native Crafts, the following general result is obtained, as the aggregate population of Calcutta, *exclusive* of the Suburbs:

Europeans	11,224
Indo-Europeans	11,036
Greeks	30
Armenians	703
Asiatics	1,441
Jews	681
Parsees	98
Africans	58
Chinese	409
Mussulmans	1,13,059
Hindoos	2,39,190
Grand Total	<u>3,77,924</u>

Comprising—	Males.	Females.	Boys.	Girls.
Europeans	6,820	2,545	907	952
Indo-Europeans	4,082	4,218	1,324	1,412
Greeks	17	7	2	4
Armenians	291	238	88	86
Asiatics	786	412	120	123
Jews	240	228	111	102
Parsees	73	15	6	4
Africans	39	9	2	3
Chinese*	378	...	31	...
Mussulmans	65,812	28,738	9,667	8,842
Hindoos	1,19,539	78,901	21,010	19,740
Total	<u>1,98,077</u>	<u>1,15,311</u>	<u>33,268</u>	<u>31,268</u>

72. Comparing the above male and female population, the following proportion is obtained :

Europeans	...	220.96 males to 100 females.
Indo-Europeans	..	96.02 ditto ditto.
Greeks	...	172.72 ditto ditto.
Armenians	...	116.98 ditto ditto.
Asiatics	...	169.34 ditto ditto.

* As the Chinese are married to Christian females, the latter have been included among Indo-European.

Jews	...	106.36	ditto	ditto
Parses	...	415.79	ditto	ditto
Musulmans	...	200.85	ditto	ditto
Hindoes	...	142.48	ditto	ditto

Giving an average proportion of 157.83 males to 100 females.

73. The following is the classification of the male population, according to ages:

Boys under 10 years of age	...	33,268
Adults from above 10 to 19 years	...	11,348
Ditto " 16 to 20 "	...	23,897
Ditto " 21 to 25 "	...	33,978
Ditto " 26 to 30 "	...	37,909
Ditto " 31 to 35 "	...	23,993
Ditto " 36 to 40 "	...	28,290
Ditto " 41 to 45 "	...	12,457
Ditto " 46 to 50 "	...	11,952
Ditto " 51 to 55 "	...	4,538
Ditto " 56 to 60 "	...	5,255
Ditto " 61 to 65 "	...	1,759
Ditto " 66 to 70, & upwards	...	2,701
Total	...	<u>2,31,345</u>

74. As, however, with reference to Europeans, the returns may more readily be relied upon, a separate table of the ages of the European male population has been compiled, and the following is the result:

Boys under 10 years of age	...	907
Adults from above 10 to 15 years	...	251
Ditto " 16 to 20 "	...	643
Ditto " 21 to 25 "	...	1,442
Ditto " 26 to 30 "	...	1,935
Ditto " 31 to 35 "	...	948
Ditto " 36 to 40 "	...	780
Ditto " 41 to 45 "	...	380
Ditto " 46 to 50 "	...	224
Ditto " 51 to 55 "	...	129
Ditto " 56 to 60 "	...	70
Ditto " 61 to 65 "	...	38
Ditto " 66 to 70, and upwards	...	30
Total	...	<u>7,727</u>

75. From Appendix, Table No. 32, it will be seen that the largest number of each Nationality constituting the adult male population of the Metropolis is of the following ages:

Europeans between	26	and 30	years of age.
Indo-Europeans	26	"	30
Greeks	26	"	30
Armenians	21	"	25
Asiatics	21	"	25
Jews	26	"	30
Mussulmans	26	"	30
Parsees	26	"	30
Hindoos	26	"	30
Africans	31	"	35

and that it bears the following proportion to the aggregate adult male population of each Nationality:

Europeans	... 28.37 per cent.
Indo-Europeans	... 14.23 "
Greeks	... 17.65 "
Armenians	... 13.06 "
Asiatics	... 17.09 "
Jews	... 16.66 "
Mussulmans	... 20.48 "
Parsees	... 24.66 "
Hindoos	... 18.06 "
Africans	... 20.51 "

76. From the Tables showing the Populations of the Town, Fort William, Coolie Bazar, the Port, and of the Jail, classified according to ages, it will be observed that the large number of 2701 is returned as persons between 66 and 70 years of age and "upwards." As this compilation had entirely to be made from the Census Returns, and as some of them exhibited almost incredible ages, it was considered advisable to make minute enquiries, but to prevent delay in the preparation of the Statistical Tables, the classification of ages was limited to the age of 70. The result of these enquiries shows the following number of persons above the age of 70, viz. :—

368 persons between the age of 71 to 75	
403 ditto	" ditto 76 " 80
92 ditto	" ditto 81 " 85
77 ditto	" ditto 86 " 90
28 ditto	" ditto 91 " 95
5 ditto	of ditto 96
2 ditto	" ditto 97
3 ditto	" ditto 100
2 ditto	" ditto 104
1 ditto	" ditto 116

Of the above, the highest age recorded is as follows:

Europeans	...	87 years.
Indo-Europeans	...	104 "
Armenians	...	84 "
Jews	...	88 "
Mussulmans	...	100 "
Hindoos	...	116 "

Details of the above will be found in Appendix, Table No. 37.

77. Comparing the present number of pukka houses and of huts with that recorded in Mr. Simms' admirable Report on the Survey of Calcutta in 1850, there is an increase of—

1,354 one-storied Buildings.
1,239 two do. do.
278 three do. do.
16 four do. do.

and a decrease of 5,297 in the number of huts. The increase in the number of buildings is, no doubt, chiefly attributable to the increased trade and prosperity of the Town, whilst the decrease in the number of huts is the result of the clearance of several Bustees or native villages, and of the due enforcement of the provisions of the Municipal Act, which render compulsory the removal of all huts built of combustible materials, unless the roofs are properly tiled and the walls covered with mud.

78. In the same Report, Mr. Simms gives an approximate estimate of the probable population of Calcutta. His calculation was based upon the result of personal enquiries, which showed that the average number of occupants of pukka houses, was 8.7, and of huts, 5.0. It is somewhat singular, that taking the same average, and computing the population on the existing number of houses, the result is almost within a fraction of that obtained at the actual taking of the Census, viz.:

15,975 Houses by 8.7	=	1,38,982
42,917 Huts by 5.0	=	2,14,585
Total	...	3,53,567
According to enumerators' returns	...	3,54,874
Difference in favor of present Census	...	1,307

79. Unfortunately there are no data by which to form an estimate of the increase or decrease of the population of the Town. It appears that attempts at taking a Census have been made at several times, and the following results are on record, viz.:

In 1800, Report of Police Committee	5,00,000 inhabitants.
1814, By Sir E. Hyde East, Bart.	7,00,000 do.

1821, By four Assessors	1,79,917 inhabitants.
" By the Magistrates	2,80,552 do.
1831, By Capt. Steel	1,87,081 do.
1837, By Capt. Birch, Supdt. of Police ...	2,29,714 do.

80. All these so materially differ from each other, that they can only be received as problematical, and would be unsafe for the purposes of comparison. Indeed the Census taken by Capt. Steel and Capt. Birch, when compared with Mr. Simms' estimate, which latter is based upon actual survey, would establish the singular fact, that whilst there was a regular decrease in the number of buildings and huts, there was a considerable increase in the population, as will be seen from the following statement:

	<i>Pucka Houses.</i>	<i>Huts.</i>	<i>Persons.</i>
According to Capt. Steel ...	15,303	54,773	= 1,87,081
" " Birch ...	14,623	50,871	= 2,29,714
" " Mr. Simms ...	13,078	48,314	= 3,61,369

81. The wonderful expansion of the commerce of this Port within the last ten years, and the large increase in the number of buildings chiefly caused by such expansion of trade, clearly show that there must be a corresponding increase in the local population, though it does not follow that it consists of fixed residents altogether. Indeed the large number of people which daily arrive and depart by the daily railway trains, principally consisting of Natives, as well as the extraordinary number of dinghees plying for hire between the Town and Howrah, seem to indicate, that by these means of conveyance at least 20,000 people daily visit the Town in their ordinary occupation; and if to these be added Garden Reach, Kidderpore, Alipore, Bhowanipore, Entally, Sealdah, Cossipore, and other places of the Suburbs, all of which are inhabited by people, many of whom have fixed occupations in Town, the total daily influx, or what may be called the floating population of the Town, may safely be assumed at 50,000.

82. It was in contemplation to station people at the several inlets and outlets of the town for the purpose of taking an account of those coming in and going out, but such could not have been done without the employment of the native police, and this was very desirable to avoid for several reasons.

83. An attempt was made to classify the population of the Town according to occupations, but this was found impracticable. Had any tables of this kind been prepared upon the strength of the Census Returns, the population of Calcutta would have shown to contain a much larger proportion of Doctors, Civil Engineers, Merchants and Agents, wholesale Traders, &c., than any other city in the world, and had those identical persons taken out their licenses as prescribed by Act VI of 1863, in accordance with their returns, the income of the Municipality would have been at least three times as much as the Accounts of the Justices for the past year exhibit under that particular head. But under any circumstances, a classification of this kind must be extremely difficult, where such a great

difference exists among the classes and nationalities exercising the same profession or trade. Even among Europeans, it would not be easy to draw the exact line between Bankers, Merchants, Agents, and the different traders, since hardly any of them limit their transactions to business strictly coming within the operations of each respective class.

84. Though it may not perhaps come within the scope of a Census, yet it may be useful to know the number of establishments spread over the Town, which are licensed to retail spirituous liquors and intoxicating drugs. There are --

104 Liquor shops.

29 Shops for the sale of Muddut.

13 Ditto ditto Ganjah.

13 Ditto ditto Chundoo.

9 Ditto ditto Toddy.

2 Ditto ditto Shiddee.

} Preparations used in smoking.

31 Hotels.

15 Boarding Establishments.

8 Retail importers of wines and liquors.

4 Coffee shops.

1 Eating House, and

1 Chop House.

230 in all, and of which—

28 are situated in Lall Bazar and Bow Bazar.

16 ditto Cossitollah.

8 ditto Waterloo Street.

3 ditto New China Bazar Street.

21 ditto Radha Bazar.

10 ditto Jaun Bazar Street, and Jaun Bazar 2nd Lane.

86; of the remaining—

73 being scattered over the Northern, and

71 over the Southern Division of the Town.

Total 230.

85. Taking the fixed and floating population of the Town at 4,30,000, the above would give only one licensed shop for the retail sale of spirituous drinks and intoxicating drugs to 1,870 persons.

86. The Health Officer, in his valuable Report on the operations of his department, records a mortality of 23,233 persons during the past year, of which

3,857 died in the 1st Division.

6,189 ditto 2nd do.

6,771 ditto 3rd do.

2,493 ditto 4th do.

3,460 ditto 5th do.

513 ditto Fort, Coolie Bazar.

And assuming the population of the Town at 4,00,000, he computes the average of mortality at 58.080. As the Mortality Returns furnished weekly by the Registrars show that they include many persons who are not fixed residents of the Town, the percentage of deaths should be calculated upon the total fixed and floating population of Calcutta. This, according to what has been shown, may fairly be estimated at 4,30,000, and thus the percentage of mortality would be reduced to 54.080 per thousand.

87. It may be presumed that of the floating population a large proportion comes daily into Town in pursuit of their vocation in connection with the commerces of this city, and if this surmise be admitted, their occupation would naturally bring them into the 2nd and 3rd Divisions which constitute the chief business part of the Town. This surmise is somewhat strengthened by the fact that the mortality in those particular Divisions exceeds that of every other Division, and is more than one-half of the whole mortality of the Town. It would be unfair to attribute this disproportion merely to the comparative influx of a floating population, because there are so many causes, which place the 2nd and 3rd Divisions under singular disadvantages, and which for the present are beyond the control of the Justices.

88. A reference to paragraph 54 of this Report will show that the 2nd and 3rd Divisions of the Town are the most thickly populated, and that the mean space allowed to each person, calculated upon the resident population, is smaller than in any other Division. If in this calculation be taken into consideration, the daily influx of people coming to transact business, and of the space required for animals kept within, it is evident that such mean space must be still less. Moreover, it is in these Divisions that the largest amount of street traffic exists, which must necessarily cause a corresponding increase of sweepings, &c., which have daily to be removed by the Conservancy Department. In fact, this is, in some measure, corroborated in the Health Officer's Report, according to which the removal of sewage matter from the drains, during the past year, amounted to 13,86,238 cubic feet, which is more than one-half of the total excavations removed from the whole of the Town. Yet, singularly enough, it is precisely in these Divisions, that the average breadth of public thoroughfares is the smallest, so that in fact the obstruction caused by the daily traffic is greatest, just where ample space is most needed. It is likewise in these Divisions that by far the greatest number of Jute Screws, Dye Shops, Oil Presses, and Soap Manufactories are situated, so that a most dangerous and offensive trade is carried on in localities, several parts of which are hardly accessible to Fire Engines, and in which up to College Street there is not one single public tank. It is a not less remarkable fact, that, although, in these Divisions the number of private tanks is the largest, the majority of them are little better than stagnant ponds, carrying in them the germs of disease. And finally, the largest proportion of establishments licensed to retail spirituous liquors and intoxicating drugs, are located in these very Divisions, so that all elements, calculated to affect the health of the residents are concentrated in the Divisions, in which the heaviest mortality occurred.

89. The Health Officer has obligingly furnished me with a separate table of mortality among Europeans, from which it appears that the number of deaths, during the past year, amounted to 304. Comparing this with the number of Europeans as shown in paragraph 71 of this Report, and amounting to 11,224 persons,* it follows that the mortality among Europeans was only 2.71 per cent., thus clearly proving the advantages of free ventilation, use of purer water, and proper observance of Conservancy Laws, the benefits of which are so well understood and appreciated by Europeans.

90. It is a matter of regret that no reliable data exist as to the number of births during the past year, because, in the absence of such information, it is impossible to form any real idea of increase or decrease of population. The Health Officer furnishes in his Report a return of *registered* births, but he himself expresses strong doubts as to its correctness. According to the statements appended to his Report, the relative number of births and deaths is as follows :

	<i>Births.</i>	<i>Deaths.</i>
Christians	... 796	1,257
Mussulmans	... 1,501	6,612
Hindoos	... 3,631	15,343
Jews	... 8	7
Parsces	... 1	1
Chinese	... 6	13
Total	... 4,913	23,233

Thus establishing, to all appearance, a proportion of 4.70 of deaths to each new-born child. It is clear that if this proportion of deaths to births really existed, the total extinction of the population of this Town, unless counteracted by some unforeseen cause, would be only a question of a limited number of years.

91. It may be, perhaps, beyond the precincts of a Report on the Census of the Town, to enquire into the causes of this singular anomaly, but I cannot allow the opportunity to pass without offering a few remarks. The Legislature, in passing Act VI. of 1863, evidently attached great importance to the value of obtaining information as to births and deaths, and, with this view, framed Sections 98 and 99 of the said Act, which impose a penalty not exceeding one hundred rupees upon the person whose duty it is to give information to the Registrar within a prescribed time. From the Report of the Health Officer it appears, that there were, during the past year, actually eighty-one convictions under the aforesaid Sections, on which the aggregate fines amounted to Rs. 134-12, being an average of Rs. 1-10-7 for each contravention of the law. It may, no doubt, accord with the views of philanthropists to impose small fines so as to vin-

* This comprises Coolie Bazar, Fort William, and the Port of Calcutta.

dicating the law, but it appears to me that a few examples of severe fines would have much sooner secured the due observance of a rule, the object and import of which Natives fail to perceive.

92. Classifying the mortality percentage according to creeds, the following is the result:

Christians	5.19	per 100
Hindoos	6.41	do.
Mussulmans	5.83	do.
Jews	1.46	do.
Chinese	3.19	do.
Parsees	0.88	do.

93. From the foregoing details, the following summary of facts is obtained—

			Bungalows.	Cottages.	Chittacks.	Feet
Total area of Calcutta, within the limits of H. M.'s High Court	15,115	8	10	27
Area of Calcutta, within the jurisdiction of the Justices	10,953	9	8	44
Area of Northern Division of the Town	6,809	12	12	3
Ditto Southern ditto ditto	4,143	16	12	41
Area occupied by Fort William	521	7	3	32
Ditto ditto Coolie Bazar	241	18	9	41
Area occupied by Buildings and Compounds in Calcutta	8,814	17	3	25
Ditto ditto, Coolie Bazar	203	19	12	24
Ditto by places of public Worship	...	Calcutta	93	5	1	15
	...	Coolie Bazar	5	1	6	33
Ditto by Tanks and public Enclosures...	...	Calcutta	519	1	8	30
	...	Coolie Bazar	3	4	5	40
Ditto by public Roads and Lanes	...	Calcutta	1,463	13	8	40
	...	Coolie Bazar	32	13	0	24
Ditto by Burial Grounds	32	12	2	24
Number of Streets and Lanes	438			
Aggregate length of them	5,70,778			feet.
Length in miles	108			miles, 32 poles, and 13 feet.
Average width	38,212			feet.
Number of Pucka Buildings, Northern Division	11,708			
Ditto ditto, Southern ditto	4,267	15,975		
Number of huts, Northern Division	31,120			
Ditto, Southern ditto	11,737	42,917		
Average space occupied by buildings, Northern Division, 2 cottages, 9 chittacks, 24 feet						
Ditto ditto ditto, Southern ditto, 4 ditto, 0 ditto, 38 ditto						
Population of the Town	3,77,924			
Average proportion of males to females	157.83			to 100
Ditto, children to adults	100			to 485.60
Average rate of mortality	5.40			per hundred.
Rate of mortality among Europeans	2.71			ditto.

94. Though every care has been taken to ensure a correct account of the population of the Town, yet it must be remembered, that all arrangements in furtherance of that object, had to be made in strict accordance with the provisions of the law. Unfortunately the law is, in this respect, defective, for although Section 104 of Act VI. of 1863, B. C., expressly provides, that "every person to whom a Schedule as hereinafter provided may have been delivered, shall afford such information in regard to all persons who were abiding in his house, or in the place under his charge, on the night immediately preceding, and in such manner, as may, under this Act, be lawfully required of them,"

yet there is no penalty attached to non-compliance with such requisition, nor is there any provision for the punishment of such persons as may make wilfully false returns. It is true no great difficulty was experienced in obtaining the returns, but there is no positive proof of their correctness, and it may be that some persons, under the dread of prospective taxation, or from prejudices of caste, have not made a faithful return of the actual number of inmates of the house. But although such cases could not have been numerous, it must always be a matter of regret that omissions of this kind should tend to impugn in some measure the correctness of the Census, and interfere with the several statistics, which are so important to the improvement of the sanitary condition of the Town.

95. It is equally to be regretted, that no arrangements could be made for the simultaneous taking of the Census of the Suburbs, which forms such an important link of the floating population of the Town. Though the difficulty of the Suburbs being placed under the jurisdiction of separate Municipalities might have been overcome, yet owing to want of means, the whole expense connected with the Census of the Suburbs would have had to be borne by the Justices, for which no provision was made in the Budget, and which, consequently, could not have been incurred without curtailing some of the more immediate requirements of the Town, to which the estimated income of the Municipality has been allotted. Although the wants of the Suburban Municipalities are such that their present income is totally inadequate to local requirements, still it is to be hoped that by the time the next Census is to be taken, they may be in a position to contribute a fair share towards the expenses which the enumeration of the population of the Town and of the Suburbs may involve.

96. In conclusion, I have to record the valuable assistance received from Brigadier General A. C. Errington, Garrison Quarter-Master Major C. F. G. Lamb, Capt. Reddie, Master Attendant, and Major Revely, Deputy Commissioner of Police, and Moulvie Abdool Luteef. The first voluntarily offered to co-operate in taking the Census of the Fort, and Major Lamb undertook the filling in of the returns for the Barracks in the Fort and at Coolie Bazar; Capt. Reddie issued instructions and distributed forms of returns to the shipping, and Major Revely personally superintended the enumeration of persons on board of native crafts and dinghees. Moulvie Abdool Luteef prepared an excellent pamphlet on the subject of the Census, which, after being translated by him into several native languages, he caused to be printed at his own expense, and of which copies were distributed among the Justices. The acknowledgments of the Justices are specially due to Dr. Francis, who, at much inconvenience to himself, very kindly placed the services of his Head Assistant, Baboo Govind Chunder Dhur, at their disposal. Of the services of the Baboo, I cannot speak too highly. He was placed in charge of the Census Office and superintended all the arrangements in connection with the taking of the Census, as well as the compilation of the several Statistical Tables, and has, in general, afforded me most valuable assistance.

A. M. DOWLEANS,
Vice-Chairman of the Justices.

CALCUTTA,
April 12th. 1866.

APPENDICES.

1866.

CENSUS OF CALCUTTA.

To the Occupier of

No. _____ Street.

You are requested to insert the particulars specified herein, in compliance with Section 106 of Act VI of 1863.

V. H. SCHALCH,
Chairman of the Justices of the Peace.

This Paper is to be filled up by the occupier or person in charge of the above premises, on the night of the 8th January, 1866.

If the house is let or sub-let to different families or lodgers, each occupier or lodger must make a Return for his portion of the House upon a separate Paper.

This Paper will be called for by the Enumerating on Tuesday, the 9th January, 1866.

Appendix No. 1.

CENSUS RETURN for the Premises No. in Street.

Names of Male Inhabitants above ten years of age.	Country and place of birth.	Age.	Race or Caste.	Occupation.	Number of Children under ten years of age.		Number of Female Inhabitants above 10 years of age.		
					Male.	Female.	Members of the family.	Servants.	Visitors and others.
<i>Firstly.</i> —Enter Members of the Family. <i>Secondly.</i> —Servants. <i>Thirdly.</i> —Visitors and others.			Those of unmixed parentage will be entered as Europeans. Do, mixed do. do. Igbo-Europeans. Native Christians—do. do. Amstics. Hindoos do. do. according to Caste. Negroes and Africans do. Negroes and Africans.						
									1st.—Europeans. 2nd.—Portuguese. 3rd.—Mahomedans. 4th.—Hindoo.
